

Samsung D900i

Due mainly to the popularity of the D900, Samsung have re-launched their best seller for the 2007 market in the D900i.

At a glance there is little difference between the two products; both have the same great 3.15 Mega Pixel camera, v2.0 Bluetooth, Document Viewer, WAP 2.0/xHTML web browser, TV output, Micro SD Card Slot, and MP3/AAC/ACC+ player. In fact, technologically speaking, the only difference is that the D900i now comes with an FM radio, but this is not just a minor improvement, it is the landmark completion of an otherwise very well rounded mobile product.

Visually, the difference between the two models is far more apparent, the D900i having glazed chrome affect edging which adds to the professional and stylish look of the Samsung veteran. Due to the obvious similarities, those upgrading from a D900 to a D900i may be slightly disappointed, however, those who are new to Samsung will no doubt be impressed by an excellent mobile product that now looks fitting for the business market.

General Network GSM 850 / GSM 900 / GSM 1800 / GSM 1900

Announced 2007

Status Available

Size Dimensions 103.5 x 51 x 12.9 mm
